# Profile

Since our inception in 2014, YonAnn has been at the forefront of innovation in smart lock solutions. With a steadfast commitment to research, development, and state-of-the-art manufacturing technologies, we design and deliver advanced electronic security systems tailored for a variety of industries—including hospitality, hotel, apartment, leisure center, school, office, and other sectors where intelligent security is essential.

As a recognized industry expert, YonAnn combines technical excellence with passion in every project. Our dedicated team works tirelessly to create reliable, trustworthy, and cutting-edge security solutions that meet the evolving needs of our clients and communities.

At YonAnn, we believe that safety is paramount. We put our heart and soul into every solution we develop, ensuring that our customers can always rely on us to protect what matters most. Join us on our journey towards a safer, smarter future.

## Our Factory

Guangzhou Yaoan Electronic Co., Ltd is a high-tech and innovative enterprise located in Guangzhou, China. Which is a combined company with product research and development design, production, sales and service into one. We have been in smart door locks business since 2010, we researched the first one model RFID cabinet lock instead of the old TM ibutton cabinet lock, and which one come to market be the class model had hot sale one for 10 years. Now our RFID cabinet lock have over 20% market in China market.

## Our Showroom

Our Products covers hotel door lock, RFID cabinet lock, bluetooth digital door lock, fingerprint door lock, and elevator control, energy saving switch etc.

## Our Strong Team

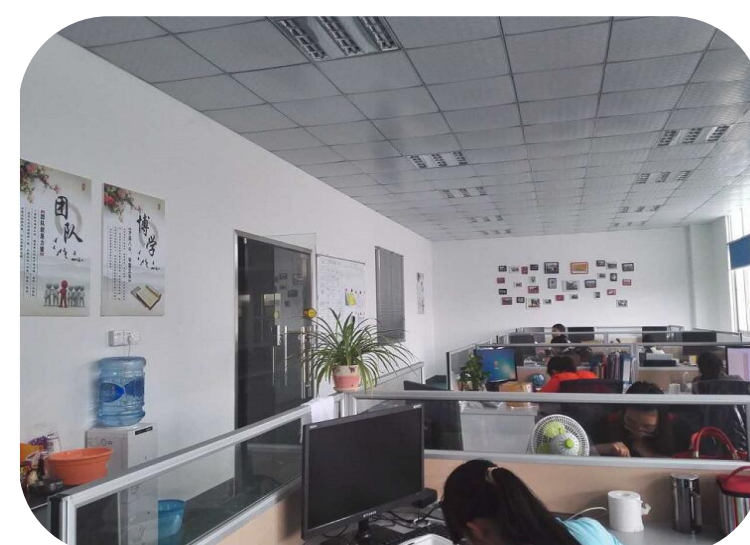

Our team cooperate and research to make sure that there are new products to market each 3 months to help the customers keep their market obtain.

The afterservice team make sure the customer's questions can solve and answer within 12 hours.

## We Will Focus on Global Market

Our main market except our domestic, global market focuses on India, Middle East, Southeast Asia, East European, Africa, and South American.

## Why choose YonAnn Electronic Locks

### We Care about You Cared

#### Industry Leading Quality

At YonAnn, we are committed to delivering industry-leading quality in every product we design and manufacture. Our expertise lies in providing top-tier security solutions with a strong focus on innovation, reliability, and advanced technology.

Our diverse product portfolio includes RFID locks, smart locks, secure door access systems, and integrated control solutions for residential and commercial applications. With a team of skilled engineers and extensive experience in the industry, we ensure that our products meet the highest standards of performance and durability.

#### Outstanding Customer Service

At YonAnn, we are dedicated to providing exceptional customer service throughout the entire product lifecycle—from initial consultation to after-sales support.

Thanks to our experienced team and extensive distributor network, YonAnn has a strong global presence, ensuring that our certified partners receive the necessary technical support to better serve customers worldwide.

Additionally, we offer comprehensive customer support, including detailed user manuals, training materials, and online tutorials to assist both installers and end-users in effectively utilizing our smart security solutions.

Each product undergoes rigorous testing to withstand extreme conditions, ensuring long-lasting security and reliability. At YonAnn, we dedicate ourselves to developing smart, secure, and cutting-edge solutions that safeguard what matters most to you.

All electronic circuit boards are manufactured in-house. Every product is designed, assembled, and tested within our facilities to maintain the highest quality standards.

Our products are developed in compliance with CE/ANSI standards to ensure durability and reliability.

#### Strength Through Reliability

We deliver high-quality electronic security solutions for the hospitality industry, commercial buildings, residential properties, and other security-demanding sectors. By leveraging modern manufacturing facilities and internal resources, we continuously develop innovative products that align with customer needs.

From the initial stages of development, our products are designed to meet the most rigorous industry standards. YonAnn's electronic locks are tested to withstand over one million operations, ensuring durability and long-term reliability.

Built with heavy-duty metal structures, and advanced locking mechanisms, our solutions provide maximum security and superior quality while maintaining a sleek and modern design for a seamless user experience.

## Innovation and Development Principles

### We Think about You Thinked

#### Innovative Flexibility

Recognized among hoteliers and interior designers, our smart locks provide the perfect balance of security and design flexibility, seamlessly blending with modern interiors.

By offering customized access control solutions, our locks cater to the diverse needs of the hospitality industry, luxury apartments, and commercial spaces worldwide.

With a deep understanding of security and user experience, we design electronic locks that meet the needs of various hotel environments and guest expectations.

YonAnn's electronic locks are specially designed for both new constructions and major hotel renovations, ensuring they integrate effortlessly into existing infrastructure while enhancing security and aesthetics.

#### Reliable Security

Our commitment to security ensures peace of mind for both hoteliers and guests.

With years of experience and advanced technology, YonAnn continues to provide dependable and secure solutions for the hospitality industry.

For over 10 years, we have built a reputation for delivering reliable security solutions, ensuring seamless protection and efficient operations.

Recognized worldwide for our security expertise, YonAnn offers trusted, innovative, and durable access control systems designed to enhance guest safety and hotel management efficiency.

At YonAnn, security is our top priority—providing you with the best door lock solutions to safeguard what matters most.

#### Humanized Functionality

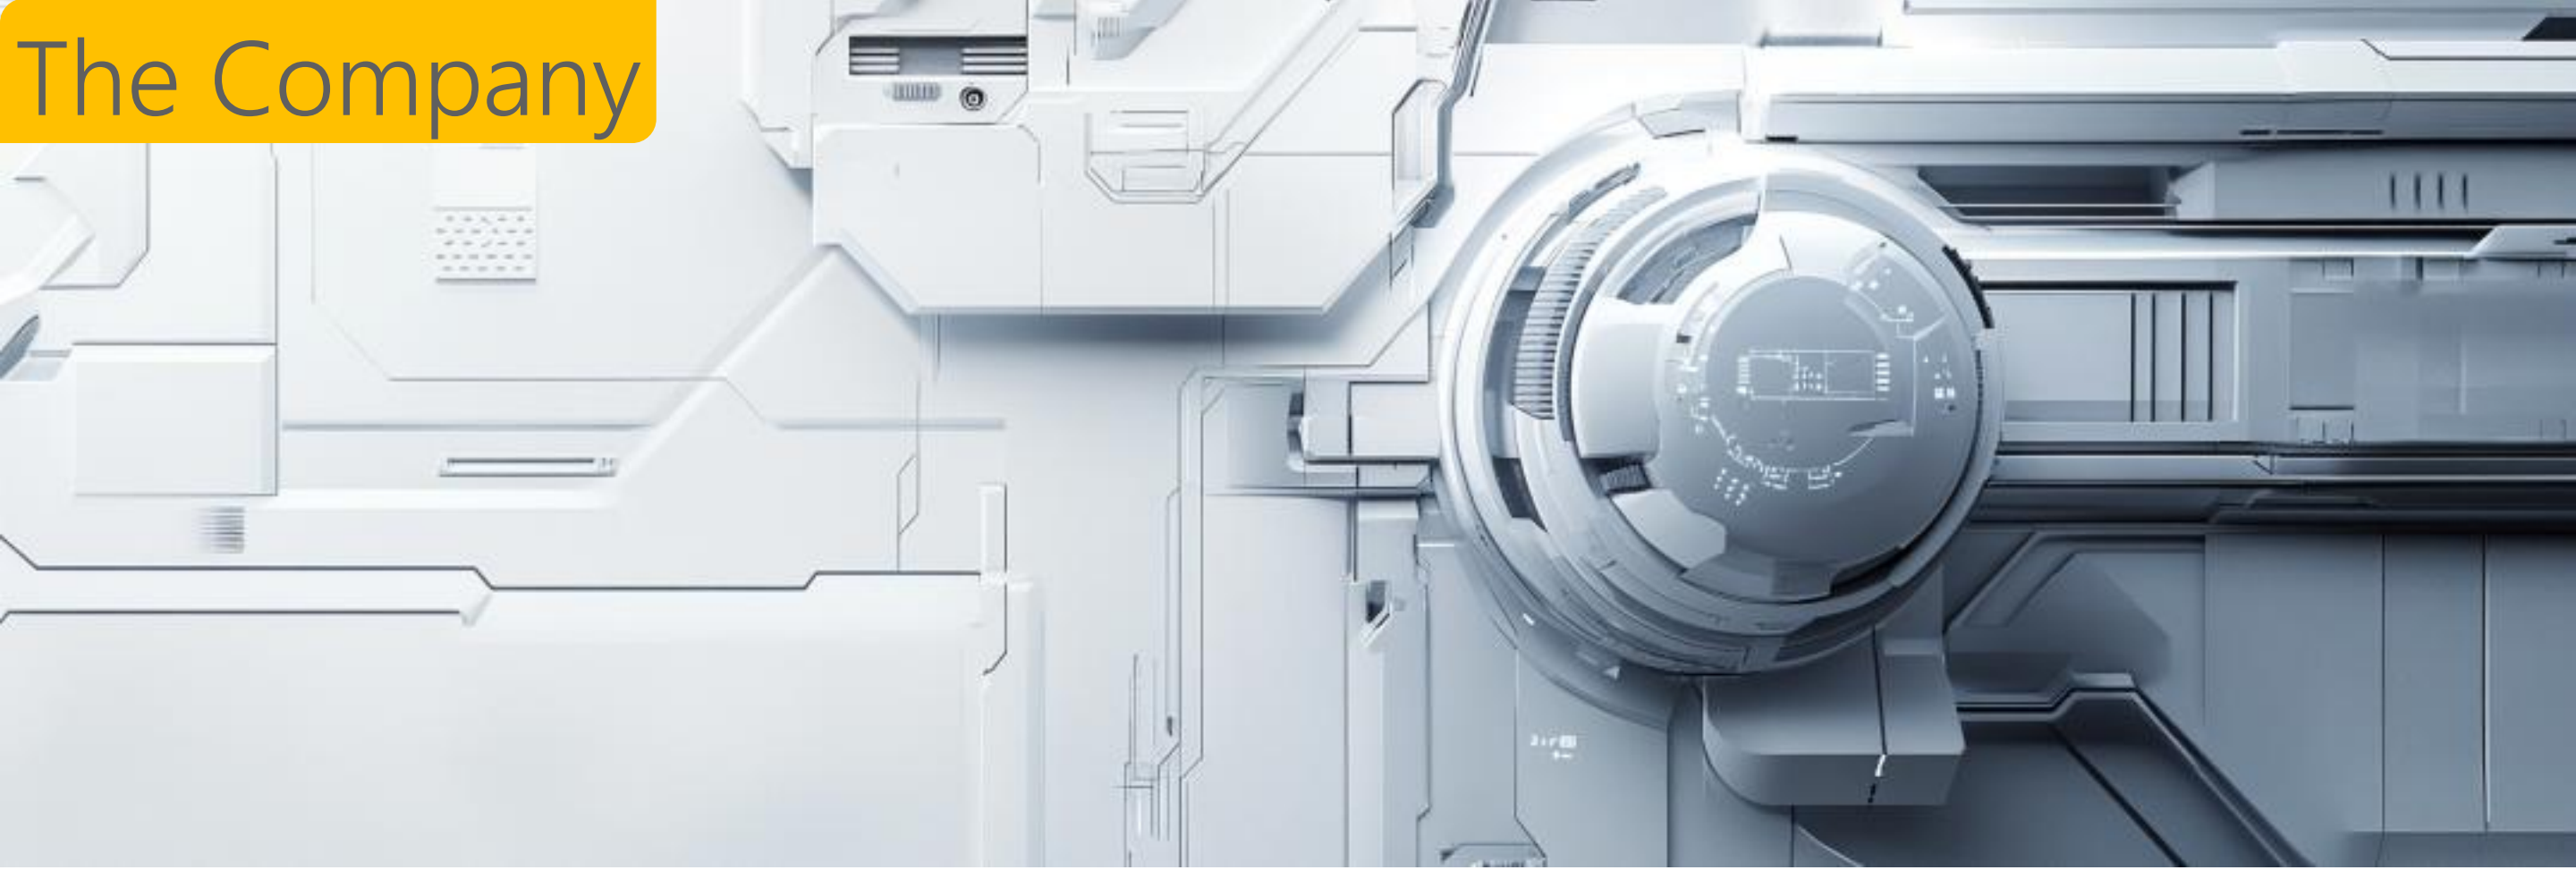

At YonAnn, our smart locks are designed to enhance security and provide a seamless user experience for both property owners and guests.

With advanced RFID technology and keyless access solutions, YonAnn smart locks offer effortless access control, ensuring maximum security while maintaining ease of use.

Our products feature intuitive operation, integrating seamlessly with PMS (Property Management Systems) to provide a fully connected hospitality experience.

YonAnn's electronic locks are developed with ergonomics, human interaction, and user convenience in mind. Extensive research and testing ensure that our locks adapt to various environments, making them one of the most ergonomic and user-friendly electronic lock solutions in the market.

With YonAnn smart locks, both security and convenience are elevated to the next level, ensuring a superior experience for property managers and guests alike.

## RFID Contactless Technology

Our RFID smart locks utilize the latest Radio Frequency Identification (RFID) technology, providing seamless, secure, and future-ready access solutions.

We offer a range of RFID solutions, including Base RFID, Guardian RFID, Shadow II RFID, and Vision RFID, all built on the same advanced contactless technology platform.

### Key Features

**High-Security RFID Technology:** Utilizes 13.56MHz frequency for reliable and secure access.

**Industry Standards Compatibility:** Fully compliant with ISO 14443A and MIFARE Classic standards.

**Future-Ready Platform:** Supports multiple sectors, enabling integration with all-in-one card applications for enhanced convenience.

**Wide Range of RFID Carriers:** Compatible with various RFID cards, wristbands, and mobile key solutions for flexible and secure access control.

With YonAnn's RFID locks, you get a versatile and scalable security solution that adapts to the evolving needs of hotels, offices, and residential spaces.

## Benefits of YonAnn RFID Electronic Locks

- **Enhanced Guest Experience**

Provides seamless and efficient access with modern RFID technology.

Eliminates the need for physical keycards by integrating mobile and hybrid authentication methods for added convenience.

- **Increased Security**

Features strong encryption and data protection, ensuring secure access control.

Lost or stolen credentials can be instantly deactivated, preventing unauthorized access.

The lock memory can be accessed via a USB port on the external unit, allowing emergency key management when needed.

Stores detailed audit trails, ensuring a secure and traceable access log.

- **Flexible and Adaptive Solutions**

Supports a wide range of RFID brands and card systems, allowing customization based on different hotel types and property requirements.

Users can choose from various keycard formats, wristbands, and key fobs to match their branding and operational needs.

- **Advanced Information and Control**

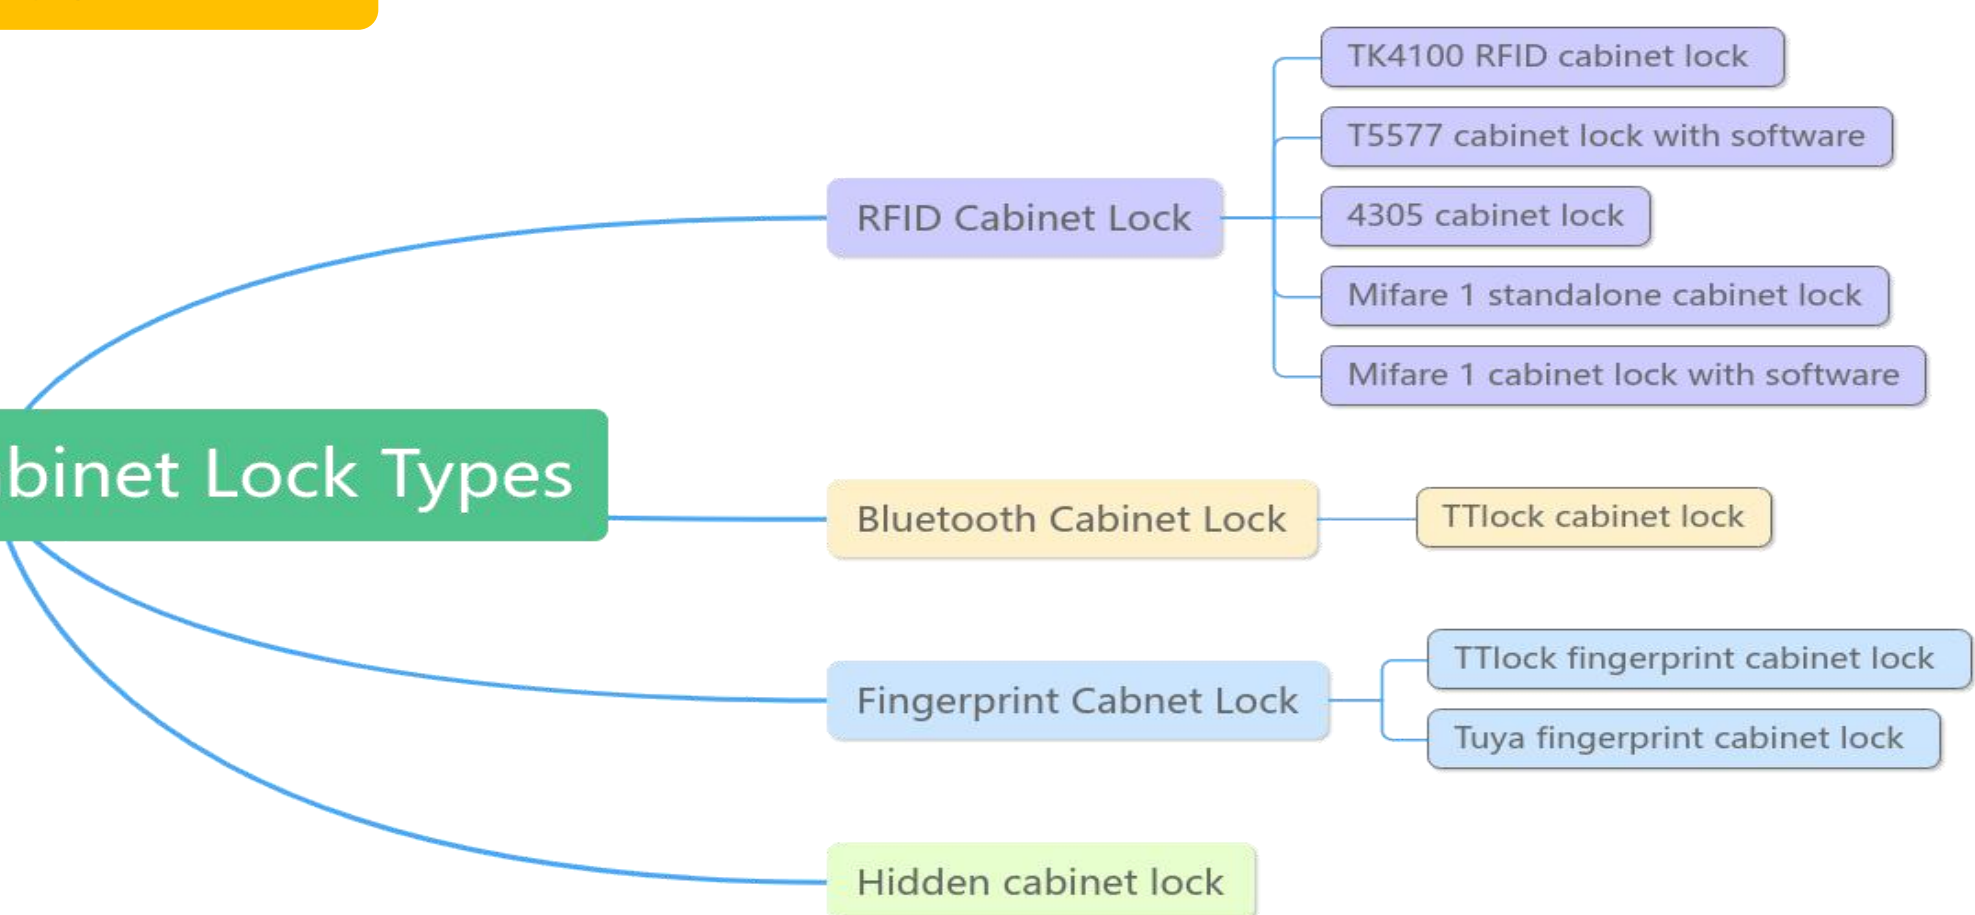

YonAnn's electronic locks integrate seamlessly with hotel management systems, enabling easy real-time access control and monitoring.

Handheld devices can retrieve entry records, audit trails, battery status, and time synchronization, improving operational efficiency.

With YonAnn RFID locks, hotels and businesses gain a secure, reliable, and future-proof access control system designed to enhance security, convenience, and overall guest

# YonAnn Smart Cabinet Lock

## YonAnn Smart Cabinet Lock Types

## Smart Cabinet Lock Consist

Cabinet lock with lock body and accessories (screws, latch etc)

Different kind wristband keys to choose (each lock with 1 pcs default keys S2)

Card encoder (work with door lock software)

PC software (standalone type no need)

## Smart Cabinet Lock Features and Technical Data

Power supply: DC6V, 4 pcs 1.5V AA battery  
 Communication :TK4100/T5577/Mifare 1  
 Frequency: 125 Khz (TK4100, T5577) / 13.56 Mhz (Mifare 1)  
 Sync Com: ≤120mA  
 Static Com: ≤8μA.  
 Temperature: -15°C~+65°C  
 Humidity: ≤95%RH  
 Packing Details: 2 pcs/box , 100 pcs/ctn ,  
 Gross weight : 35kg/ctn

1. Adopt zinc alloy/stainless steel /aluminium material (durable, easy to install ,low build cost
2. Music notice when unlock door
3. Two type unlock mode : single card mode and dural card model .
4. Public mode available
5. Low voltage alarm
6. Extra Power supply available in case out off power
7. Hidden handle .
8. Waterproof wristband key , with moistureproof and dustproof .
9. Type-c extra power supply
10. Hidden emergency way to unlock

SA011 for gym 550 pcs

SA002 for factory 12000 pcs

Ashley Cheung

I like to cooperate with them , for it's quick response and don't have much limited it's good for my small business .

I am looking forward to more projects cooperation future !

Mr. William Rodriguez

I had work with YonAnn for 7 years , they always make me pleased . They have effective and timely communicated , and can give me some good suggestion to let me choose instead of always push . Make me have better impression is they do me a lot of favor for me out of their work

Miguel Santos

I have a nice experience in cooperating with YonAnn, they offer good products and service , I will recommend my friends if they need their products

Robert Waade

Thanks you very much for you to deal with my orders with your efficienctive and professional work . and I get much knowledge about hotel door lock and wireless digital door locks . These helps me a lot on my project s .

I hope there will be more project in the future ,we will have future cooperation .
